ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

The three farm ponds are in a well defined grassy swale flowing to a jurisdictional tributary. However, the swale lacks indications of an Ordinary High Water Mark (OHWM) needed to be a jurisdictional tributary itself so the ponds are not connected or jurisdictional.
